

Senior Manager – Business Planning

Bangalore

Are You Wired To Fit?

To architect and lead key cross functional projects with specific deliverables

To pro-actively figure out gaps in our existing systems and processes as we scale up and help plug them.

To ensure that there is a stream of insights on specific themes and topics for the organization to galvanize around.

To drive more rigorous decision making or to facilitate clean and fast execution of critical initiatives.

Closely working with CEO/COO in setting up a “Project Engine” within the organization to ensure that all key initiatives are firing.

Project Manage key strategic cross functional projects collaborating with the functional leads

Lead some of the important cross - functional projects directly

Involves analysis and presentation of relevant organization data, supporting the planning process by providing requisite info & data and preparation of executive summary & periodic forecasts

Detailed Analysis of Business Plans - Scenario Planning, Demand Estimation, Product-wise Profitability, Cost Comparisons

Regular interaction with the Functional Heads on the issues related to the business and maintain necessary flow of information to and from them and providing inputs wherever desired

What'll Push-Up Your Chances?

You will have Engineering / Master's degree in Business Administration, General Management, or related Master's degree (e.g. MBA) ideally with a relevant postgraduate qualification and professional certification

Candidates from Tier-1 Institutes only with consulting background may apply.

You will be tech savvy, commercial with a strong understanding of the online space.

You will be keen to learn, highly creative and unique in your approach to implementing strategies

Experience working in a fast growing, ambiguous and constantly changing environment

Ability to set a vision and proven experience of execution.

You are willing to roll up your sleeves and get your hands dirty
