

## **Backend Developer JD**

### **About the company**

Zivame was founded in 2011 with the vision to facilitate women to shop uninhibitedly for intimate wear and to make lingerie shopping comfortable. Zivame is now the No. 1 online lingerie company in India with 30 + retail stores and a presence in 800 + partner stores across India. Our Mission is to be the destination for every woman's intimate needs. We believe that every woman is unique, and we want to deliver a platform that allows her to browse, discover, and shop what is right for her.

All the products at Zivame stem from the desire to design something that is a blend of quality and comfort. Zivame offers trendy lingerie, activewear, sleepwear, and shapewear in over 3000 + exclusive designs and 100 + sizes catering to women across all body types.

### **About the Role:**

#### **Stuff you ABSOLUTELY MUST have done**

- Worked on either JAVA or NODE or BOTH (Duh!)
- Written complex queries for MySQL or PostgreSQL
- Optimized code for high performance
- Object-Oriented Design and Programming
- Worked on SOLR

#### **Good stuff that you should have done (or should sound familiar)**

- nslookup/dig
- ping
- wget/curl
- Used Postman
- Handled at least one product/feature end-to-end

#### **"Bad" stuff that you should have done**

- Caused a memory issue/deadlock/CPU utilization issue
- Been directly responsible for at least one production issue

- Created a bug that took at least a couple of days to figure out and fix
- Had heated arguments with co-workers about your code (or theirs)

**Stuff you will be working on; aka Stuff you should be excited about**

- E-commerce
- Coding for a large user base and high-traffic volumes
- Solving interesting problems with tight deadlines
- Working with obsessive-compulsive Product Managers
- Creating products that are high-quality, highly scalable, and with bugs that most users/testers will not find
